Pedal raising kit

Cars concerned

Saab 9-5

Background

It has been found in certain cases that short drivers cannot obtain a comfortable driving position. Or place the seat according to Saabs "IN CAR 'SAFETY'" recommendation.

For this reason a pedal raising kit has been developed.

The kit should be fitted as described in the installation instruction which delivers together with the kit.

This pedal raising kit does not prevent tall persons from obtaining a comfortable driving position.

Materials

40 01 10 151 (CA: 30571838) Pedal raising kit, Automatic transmission.

40 01 10 144 (CA: 30572430) Pedal raising kit LHD, Manual gearbox.

40 01 10 169 Pedal raising kit RHD, Manual gearbox.

All kits contain pedal raising components, screws, nuts and templates for drilling holes for all pedals. All kits also contain an installation instruction.
